Adolescent Social Networks: Friendship Cliques,

Adolescent Social Networks: Friendship Cliques, Social Isolates, and Drug Use Risk Susan T. Ennett and Karl E. Bauman

One reason for studying the relationship of various friendship patterns to adolescent drug use is suggested by the likelihood that these forms affect how Adolescent social networks: Friendship cliques, social ...

The friendship patterns evident in adolescents' social networks have important implications for adolescent behavior, including problem behaviors such as drug use, delinquency, and sexual behavior. Through friendships, adolescents learn about what others are doing, anticipate accepted and expected behaviors, figure out how to present themselves, and find partners for trying out new behaviors. Tracing teen drug use to social cliques

The duo's follow-up study conducted in 2000, Adolescent social networks: Friendship cliques, social isolates, and drug use risk, took the discussion a step further. Ennett and

Bauman focused on the factor of peer relationships as a primary reason for cigarette smoking within the adolescent demographic.

Adolescent Social Networks: School, Demographic, and ...

...

Peer relationships are considered to be a dominant feature of adolescence, but systematically formed social networks rarely have been studied. A social network analysis was used to describe adolescent friendship patterns and to compare them across schools and time. Ninth graders (n = 1030) at five high schools identified their friends at Wave 1. **Gender Differences in Social Relationships, Social ...**

The implications for social control, social networks and gender perspectives are discussed. Although numerous studies have examined the relationship between family and religion on delinquency, there have not been studies of the relationship between parents, friends, and religion on substance use among adults.
