Transformation Planning and Organizational Change | The ...

Change Management is the process for obtaining the enterprise (or business) intelligence to perform transformation planning by assessing an organization's people and cultures to determine how changes in business strategies, organizational design, organizational structures, processes, and technology systems will impact the enterprise.

Information system - Wikipedia

Information systems (IS) are formal, sociotechnical, organizational systems designed to collect, process, store, and distribute information. In a sociotechnical perspective,

information systems are composed by four components: task, people, structure (or roles), and technology.

Role of Information Systems in an Organization | Bizfluent

At the most basic level, an information system (IS) is a set of components that work together to manage data processing and storage. Its role is to support the key aspects of running an organization, such as communication, record-keeping, decision making, data analysis and more.
